PROJECTS

PredictLab – End-to-End Machine Learning Platform | *Python, Scikit-learn, Pandas, NumPy, Streamlit, Joblib* Live Demo

- Developed an interactive ML platform demonstrating complete workflows including classification, regression, NLP, and clustering.
- Built data preprocessing pipelines using `Pipeline` and `ColumnTransformer` for efficient model training.
- Implemented real-time predictions through a user-friendly Streamlit interface.
- Designed and deployed 4 core modules: Classification, Regression, NLP (Sentiment Analysis), and Clustering.
- Achieved ~85–90% accuracy in classification models depending on dataset.
- Structured the project for scalability and easy extension of new ML models.
